

Chess Camps

Develop your child's intellect through the royal game of chess! Current research has shown a strong link between chess and academic performance in a variety of areas, including mathematics and language arts. Also, chess has been proved to enhance children's motivation, concentration, focus, social skills, and creativity.

Learn how to win at chess! No previous knowledge of chess is necessary. Each class will consist of a fun and interactive teaching period and guided practice time. Due to the small size of the group, each child will receive plenty of personalized attention. Both new and returning participants are welcome and will get to the next level under the guidance of an experienced Chess Scholars coach. There will also be a chess competition with prizes!

COMPUTER EXPLORERS

Create and Animate with Scratch 2.0

Students will learn the fundamentals involved in creating a video game world, using Scratch, the innovative programming language created just for kids by MIT. In this class, students will be introduced to programming by creating and editing sprites and game opponents. They will learn about sound and video as they “level up” through the building of their own game. Students work together in teams and will receive a copy of the software and their game at the end of class.

Lights, Camera, Action

—Making Your Own Star Wars Movie

Do you want to be the next George Lucas? We will create our very own Star Wars™ movie using special digital movie making cameras and software. As directors and producers we will work in teams to create our own story and script, build various Star Wars™ Lego® scenes and film our own movie. We will use graphic editing techniques and stop motion animation, add background noise and music, and show our movie at a private screening on the last day of class. All students will get a copy of their movie after class is complete
