

Solutions Exploration Group (SEG) 6 – Hinsdale Works

Platform Statement

Hinsdale 2025 will help integrate the land use, zoning, community character, transportation, parking, housing, environmental issues, economic development, public infrastructure and public service policies of the community. The Solution Exploration Groups will evaluate a range of remedies to complex municipal issues and anticipate new problems, challenges and interdependencies. A well-researched and principled strategic direction respecting the goals, values and community character of the Village will then be adopted for implementation.

The goal of the Hinsdale Works SEG is to determine the appropriate level of service for public utilities, the relative importance of utility burial and the development of an effective stormwater management strategy. Other issues including public amenity enhancements like sidewalks, WI-FI, cellular service and the potential annexation of unincorporated parcels will also be studied. Recommendations that support the goals and move existing levels of service toward the desired level will be made. The Hinsdale Works SEG will address the following issues:

- Streets, curbs, alleys
- Sidewalks
- Sewers
- Utility poles & line burial
- Annexation of unincorporated parcels
- Stormwater Management
- Technology: WI-FI, safety cameras, cellular service
