On Friday, January 10th we will be hosting a fundraiser to drive awareness and raise money to support this cause.

The American Academy of Pediatrics, professionals within the telecom industry and environmentalist have been warning us about the harmful effects of 5G radiation. It is alarming.

Hinsdale is a test site for 144 - 5G towers. Western Springs is a test site as well. We need to join forces to STOP this rollout to ensure the safety of our community.
